PROJECTS :

1.Online Room Mate Finder

The project is being developed for the hostel students. The web application is used by college students to find a room mate for hostel rooms based on criteria given by the user.

2. Computer Graphics Project on Sinking of a Ship in Heavy Storm.

This Project uses different transformation effects such as translation,scaling, rotation etc along with the usage of fractals by using C and C++.

Tools: Code Blocks 16.01

EXTERNAL PROJECTS :

1. Social

Currently working on an Android Application to develop a platform for management of a social organization's events and member details.

2. Farmgram

Developed an Android application at DJSCE for 'Codeshastra'-a 24 hour hackthon organized by the Computer Society of India student chapter. This application had the vision of eliminating the 'man-in-middle' norm for agriculture product selling and created a platform for the farmers to use this simple application and get correct price for their yield.
